

Common Studio Lighting Accessories

Soft Boxes

Used to throw a diffused light on the subject or as a backlighting.

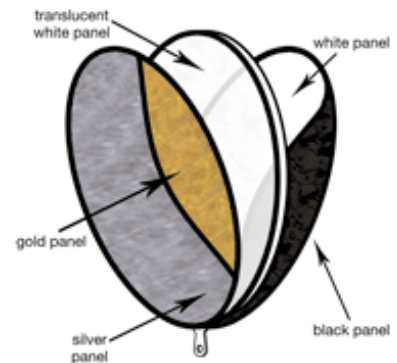

Common Studio Lighting Accessories

Reflectors and Diffusers

This provides high output with moderate feathering, making it a perfect soft light source for portraits.

Used to bounce light for side lighting or to reduce shadows.

Umbrellas provide a wide angle of light spread and total light coverage, particularly when used in bounce light situations.

Common Studio Lighting Accessories

Barndoors

Barndoors are designed to open and close to throw the light in the direction of your choice. With four doors, you can angle your light for spot lighting, hair lighting, and back lighting.

Fitting in the UMF Unit Mainframe

Snoots

For localized light control

Grid Spot Attachment

Grid Spot Attachment is designed to fit directly over your flash unit's standard 7-inch reflector. This built-in grid reflector will take the 80° beam spread of your standard reflector down to a highly controllable 18° spread for a back or hair light
